Not just a trending software, it's an information solution

Scottsdale, Arizona, U. S. A., www.scientificmonitoring.com

Learn how our monitoring solutions are helping companies stay on top of incipient failures of engines and other aircraft equipment, and plan maintenance actions before schedule interruptions occur.

Find out how we can help you improve availability and efficiency.

The MRO Americas Conference and Exhibition is the largest gathering place for airlines, buyers, operators, OEMs, MROs and suppliers. The conference will feature the latest in strategic ideas, best practices, case studies and leading edge products and services, all designed to improve efficiency, reduce costs and improve ROI.

For details of the Conference visit: <http://www.aviationweek.com/events/current/mro/index.htm>

Visit our booth and enter the drawing for the AIAA Education Series book: Aircraft Engine Controls: Design, System Analysis, and Health Monitoring by Link C. Jaw, PhD with Jack D. Mattingly, PhD.

There will be multiple winners each day.
Books will also be sold at the booth at a significant discount.
Have your book signed by the author.
